

Exhibit 3

- a. All medical materials and equipment used in connection with the execution attempt, including, but not limited to drugs, syringes, IV lines, tubing, needles, catheters, medical supplies, restraints, gurney components, monitoring equipment, and any other execution-related physical materials, whether used, unused, partially used, discarded, or retained;
- b. All packaging, labels, inserts, lot-number information, chain-of-custody documentation, and storage records relating to execution chemicals or medical supplies;
- c. Any biological or chemical residue associated with the execution process;
- d. Any photographs, video recordings, audio recordings, surveillance footage, body-camera footage, livestream feeds, witness-room recordings, or monitoring data relating to the attempted execution or preparation for the execution;
- e. Any handwritten notes, logs, checklists, timelines, incident reports, witness accounts, after-action reports, memoranda, emails, text messages, Signal messages, encrypted communications, or other communications concerning the attempted execution;
- f. Any documents or communications concerning deviations from protocol, complications, delays, equipment issues, venous-access attempts, administration of chemicals, consciousness assessments, or emergency responses;
- g. Any medical charts, records, monitoring records, time logs, and documentation reflecting the physiological condition of Ms. Pike before, during, and after the attempted execution, or that were otherwise prepared, relied upon, documented, or otherwise used in connection with the attempted execution;
- h. Any policies, protocols, training materials, directives, or internal guidance relied upon or referenced in connection with the attempted execution; and
- i. The complete execution chamber and all associated areas in their current condition, including any physical layout, equipment placement, stains, residue, markings, or alterations.
- j. All training and employment records of all members of the execution team, including but not limited to the IV Team and the Special Operations Team Leader.
- k. All communications relating to the decision to call for emergency medical services for Ms. Pike and the procedures for emergency medical services to access Ms. Pike;
- l. All information provided by TDOC staff/state actors to emergency medical personnel and/or hospital personnel relating to Ms. Pike;

- m. All communications relating to the decision to halt the execution of Ms. Pike;
- n. All communications between TDOC staff/state actors and any representative of Governor Lee or the Governor himself relating to the decision to call for emergency medical services or otherwise halt the execution; and
- o. To the extent any of the foregoing items has been discarded, destroyed, deleted or otherwise no longer exists (each, a "Deleted Item"), TDOC must make reasonable efforts to recover any and all Deleted Items, and state in detail the reason that the Deleted Item no longer exists and the steps taken to recover it, including, without limitation, (i) when TDOC discarded, destroyed, lost or deleted that Deleted Item; (ii) the individual responsible for discarding, destroying, losing or deleting that Deleted Item; (iii) any efforts taken to preserve that Deleted Item; (iv) any and all efforts taken to recover that Deleted Item (including the persons involved in such recovery attempt); and (v) for recovered items, the amount of time such Deleted Item was not secured in TDOC custody.

In addition:

- a. That the undersigned legal counsel be permitted immediate access to Ms. Pike to independently document her condition;
- b. That TDOC permit immediate inspection and transmission of any residual amounts of the lethal injection chemicals, syringes, and/or IV lines used during the attempted execution to an expert for chemical analysis and review.
