Legally Indefensible: Requiring Death Row Prisoners to Prove Available Execution Alternatives

The Supreme Court has twice considered and rejected Eighth Amendment challenges to state lethal injection procedures, concluding in both cases that the condemned prisoners failed to show that the execution process in their states posed sufficient risks of pain and suffering to be adjudged cruel and unusual punishment.¹ More broadly, the Court's decisions in an array of lethal injection challenges have declined to seriously entertain claims that execution procedures are constitutionally infirm, while insisting that method-of-execution challenges not delay executions.² Most recently, the Court reasserted the very high legal bar condemned prisoners must meet to satisfy the Eighth Amendment, and added to this burden a requirement that the plaintiff "identify a known and available alternative method of execution that entails a lesser risk of pain" than the challenged procedure.³

In its 2008 *Baze v. Rees* plurality opinion, the Court established the legal standard for an Eighth Amendment challenge to an execution procedure. A petitioner must prove a "substantial risk of serious harm," an "objectively intolerable risk of harm" that pre-

vents prison officials from pleading that they were 'subjectively blameless for purposes of the Eighth Amendment.'⁴ This legal standard is a difficult, "heavy burden."⁵ In the eight years since the Supreme Court decided *Baze*, no court has held that an existing procedure violates the cruel and unusual punishment clause, despite several high-profile, gruesomely bungled executions, experimentation with new drug formulas, and questions about the quality and sources of the drugs departments of corrections are using. However, what tips the condemned prisoners' burden from heavy to extraordinary is the requirement announced in the Court's 2015 decision in *Glossip v. Gross* that the condemned prisoners themselves must present and prove a "readily available" and "feasible" execution procedure to replace the challenged procedure.⁶

The requirement that petitioners proffer and prove an alternative method of execution may prove to be unworkable, both legally and practically. If, however, condemned prisoners are ever to meet this standard, they must have access to relevant information regarding their department of corrections' current execution protocol, other procedures considered but rejected, and the department's capacity to perform other procedures. This type of information, which is unquestionably relevant to the plaintiff's legal burden, is largely unavailable because of the secrecy that currently surrounds execution procedures.

Over the past five years, as states encountered obstacles to purchasing the drugs they use in executions, they responded by passing secrecy statutes that broaden the categories of information related to execution procedures that must be kept confidential and enhance the

BY MEGAN MCCrackEN

degree of secrecy surrounding such information.⁷ With these laws in place, departments of corrections are able to obscure important details about executions, particularly information about their purchases of execution drugs and what, specifically, those drugs are.

The Evolution of the Alternative Requirement

Prior to *Glossip*, the Supreme Court never held that a method-of-execution claim requires proving the existence of an alternative. In *Nelson v. Campbell*, the Court held that David Nelson, a death-sentenced prisoner in Alabama who had severely compromised veins as a result of years of drug abuse, could lodge a civil rights action under 42 U.S.C. § 1983 to challenge the state's planned use of a "cut-down" procedure to access his vein for execution. The Court's reasoning relied in part on the fact that the lawsuit did not "call into question the death sentence itself" because it would allow Alabama to execute Mr. Nelson, as long as the executioner did not use the cut-down procedure, which the petitioner characterized as "wholly unnecessary to gain venous access." The Court acknowledged that Mr. Nelson had "alleged alternatives that, if they had been used, would have allowed the state to proceed with the execution as scheduled," without the need for a stay of execution. The fact that Mr. Nelson pointed out this alternative was viewed favorably, as a sign that his lawsuit did not seek to invalidate his death sentence and, therefore, was not a habeas claim in disguise, as argued by the state, but rather properly brought under Section 1983.

The Court's analysis in *Nelson* left no doubt that a method-of-execution challenge could not be used to undermine the validity of the prisoner's death sentence. Habeas claims call into question the legality of a prisoner's conviction and/or sentence, whereas a claim under Section 1983 traditionally challenges conditions of confinement, i.e., whether the government is carrying out the sentence in a constitutional manner.⁸ While a challenge to the way a lethal injection is performed may not initially appear to be a perfect fit for Section 1983, method-of-execution challenges are distinguishable from habeas claims precisely because they address only the way in which a department of corrections performs executions and do not disturb underlying convictions or sentences.

The idea that a death-sentenced prisoner ought to provide an alternate

method of execution arose again in *Hill v. McDonough*, where the Supreme Court held that the petitioner's challenge to Florida's lethal injection procedure was cognizable under Section 1983. The United States filed an amicus brief in *Hill*, arguing that prisoners who challenge execution procedures under Section 1983 must "identif[y] an alternative, authorized method of execution." The government argued that if a petitioner does not plead an alternative method, the legal challenge "is more like a claim challenging the imposition of any method of execution — which is to say, the execution itself — because it shows the complainant is unable or unwilling to concede acceptable alternatives."⁹

The Court explicitly declined to adopt the heightened pleading standard sought by the government, noting that *Nelson* had not done so. The Court reasoned that as long as the civil rights challenge did not foreclose execution, it was properly styled, and the condemned prisoner was not required to plead or prove an alternative method of execution. However, the Court made clear that if a Section 1983 action sought relief that "would foreclose execution, recharacterizing a complaint as an action for habeas corpus might be proper."¹⁰ As in *Nelson*, the Court found that Mr. Hill's challenge left the state "free to use an alternative lethal injection procedure," and therefore did not bar carrying out his death sentence.

Baze v. Rees and Alternatives to a Concededly Humane Execution Procedure

After *Nelson* and *Hill*, litigation challenging lethal injection procedures began to reveal that states were engaging in risky execution practices and employing incompetent execution personnel. In response, courts put executions on hold to review the constitutionality of execution protocols in those states.¹¹ Following the Supreme Court's grant of *certiorari* in *Baze*, executions were halted across the country while the Court considered the case.

The *Baze* plaintiffs did not directly challenge the constitutionality of Kentucky's execution procedure, which called for serial administration of a barbiturate anesthetic (sodium thiopental), followed by a paralytic and concentrated potassium chloride. The plaintiffs conceded that executions would be humane, as long as the protocol was performed correctly, because a properly administered dose of the barbiturate would place

prisoners under general anesthesia and render them insensate to all subsequent stimuli.¹² Rather, the plaintiffs argued that the process was constitutionally infirm because of a significant and unnecessary risk of maladministration of the procedure, which would lead to pain and suffering in violation of the Eighth Amendment. *Baze* was a case about risk of maladministration and whether the state employed adequate procedures to safeguard against errors and mistakes in carrying out the execution procedure.

As in *Nelson*, in which the condemned prisoner proposed a different type of IV access to obviate the need for a cut-down procedure, the *Baze* plaintiffs argued that the risks of maladministration were unnecessary, given the existence of readily available alternatives that presented less risk of pain and suffering. The petitioners proffered one alternative procedure and one safeguard to be added to the existing procedure. The proposed alternative procedure called for administration of one drug, a large barbiturate overdose, which would reduce the risks of harm by simply not using the paralytic or potassium, the drugs that cause pain and suffering and are not necessary to cause death. The proposed safeguard to ensure proper administration of the existing protocol called upon the state to have a doctor present to monitor the prisoner throughout the execution, which would reduce risks of harm by better ensuring that the condemned prisoner remains anesthetized until death occurs.¹³

A plurality of the Court agreed that maladministration of a humane protocol could cause an inhumane, unconstitutional execution and that risk of maladministration of an execution protocol implicates Eighth Amendment protections.¹⁴ A majority of the justices concluded, however, that the *Baze* petitioners did not meet the "threshold requirement" of showing a "substantial risk of serious harm" because the risks of maladministration presented could not "remotely be characterized as 'objectively intolerable.'"¹⁵ The *Baze* plurality opinion agreed that the showing of "substantial risk" was "the threshold requirement" for a prisoner challenging a method of execution.¹⁶ The plurality also discussed, without precisely defining, a role for proposed, alternative execution procedures under the Eighth Amendment, stating that "a condemned prisoner cannot successfully challenge a state's method of execution merely by showing a slightly or marginally safer alternative."¹⁷

Instead, the proffered alternatives must effectively address a “substantial risk of serious harm.” [] To qualify, the alternative procedure must be feasible, readily implemented, and in fact significantly reduce a substantial risk of severe pain. If a state refuses to adopt such an alternative in the face of these documented advantages, without a legitimate penological justification for adhering to its current method of execution, then a state’s refusal to change its method can be viewed as “cruel and unusual” under the *Eighth Amendment*.¹⁸

Given the context of *Baze*, in which the plaintiffs conceded that the execution procedure was humane, it makes sense that they presented alternatives that would decrease the risk of maladministration. It also makes sense that the Court concluded that a mere showing of a “marginally safer alternative” cannot satisfy the legal standard to demonstrate an Eighth Amendment violation. However, absent these circumstances — specifically, when a petitioner demonstrates that the challenged procedure presents a “substantial risk of serious harm” — the state would violate the Eighth Amendment if it carried out an execution using that procedure, regardless of the existence of a less risky procedure.

Glossip v. Gross and the Impossible Pleading Standard

The *Baze* plurality opinion clearly set out to resolve concerns about lethal injection procedures in a way that would shut down future lethal injection litigation and, specifically, prevent the litigation from delaying additional executions.¹⁹ Indeed, following the decision, courts in Tennessee reversed previous findings of unconstitutionality, and executions resumed in many jurisdictions.²⁰ At the same time, however, serious problems with lethal injection executions continued, and troubling information about the states’ execution practices continued to come to light. Despite these problems, many condemned prisoners were told they could not prevail on an Eighth Amendment challenge to a lethal injection procedure unless they provided an alternative means to carry out their executions.²¹

The *Baze* opinion did not hold that petitioners challenging a method of exe-

cutation must provide an alternative means to carry out their executions, but several circuit courts interpreted it this way. Then the Supreme Court made it official with the *Glossip* decision.

Despite sharing obvious similarities — both cases challenged lethal injection procedures under the Eighth Amendment, and both challenged protocols that called for administration of three drugs — *Baze* and *Glossip* were very different cases that addressed different risks of harm. Whereas *Baze* challenged the risk of pain and suffering that would result from maladministration of a concededly humane procedure,²² *Glossip* challenged the risk of harm caused by use of a drug that is not suited to the task of protecting condemned prisoners from pain and suffering during execution.²³

Glossip was not a case about safeguards against maladministration of an otherwise humane procedure. Rather, the prisoners in *Glossip* contended that Oklahoma’s execution procedure, performed properly, put condemned prisoners at substantial risk of pain and suffering because of the use of a benzodiazepine sedative (midazolam) as the first of three drugs. The *Glossip* plaintiffs argued that the use of midazolam rendered the three-drug procedure inhumane and unconstitutional because the drug’s properties make it unsuitable for protecting condemned prisoners from the known pain and suffering caused by the paralytic drug and concentrated potassium chloride. In this context, the Court in *Glossip* explicitly held that “identifying a known and available alternative method of execution that entails a lesser risk of pain” than the challenged procedure is “a requirement of all Eighth Amendment method-of-execution claims.”²⁴

The *Glossip* Court found that the petitioners did not demonstrate a substantial risk of serious harm because they “failed to establish that Oklahoma’s use of a massive dose of midazolam in its execution protocol entails a substantial risk of severe pain.”²⁵ Under *Baze*, that conclusion should have resolved the case because the plaintiffs had not satisfied the “threshold requirement” of demonstrating a substantial risk of serious harm.²⁶ While nominally reaffirming the legal standard established in *Baze*, however, *Glossip* did not follow that standard. First, the Court combined the “threshold requirement” with a requirement that the prisoner prove the

availability and feasibility of an alternative execution procedure. Next, the Court inverted the standard by first addressing the alternative requirement — concluding that the plaintiffs had “not proved any risk posed by midazolam is substantial when compared to known and available alternative methods of execution” — before considering the “threshold requirement.”²⁷

By making the provision of an alternate procedure an element of the Eighth Amendment showing, the Court did not address the differences between a challenge to an admittedly humane procedure that could be performed incorrectly, thus leading to pain and suffering, and a challenge to an inherently risky procedure, in which the risks of harm arise from the actual drugs used. In a dissenting opinion, Justice Sotomayor called the Court’s conclusion that the petitioners’ challenge failed because they did not provide an alternative means of execution “legally indefensible” and accused the majority of “faulting petitioners for failing to satisfy the *wholly novel* requirement of proving the availability of an alternative means for their own executions.”²⁸ Justice Sotomayor plainly laid out the absurdity of the holding that the Eighth Amendment’s constitutional protection against cruel and unusual punishment is conditional, rather than absolute.²⁹

Secrecy Laws Insulate States From Eighth Amendment Challenges

As interpreted and applied by trial courts, *Glossip*’s alternative requirement appears to be unprovable. Since *Baze*, death-sentenced prisoners have argued that a requirement to provide an alternative method is unethical and improper. But in just the past year, several courts have followed the Supreme Court’s lead by dismissing lethal injection challenges based on findings that the proffered alternatives were either not available or not feasible, without first examining the constitutionality of the existing procedure. Such analyses cannot stand. Courts must determine whether the existing procedure meets constitutional muster.

Moreover, condemned prisoners must have access to relevant evidence to support their arguments regarding both existing procedures and proffered alternatives. Currently, much of that information — about drugs and drug acquisition, facilities, capabilities, budgets, competence, personnel, etc. — is held by the state, and courts have consistently refused to order its disclosure. Secrecy

statutes that make unavailable virtually all information about execution procedures, particularly the sources and kinds of drugs used, increase the difficulty. Petitioners can demonstrate that available and feasible execution methods exist,³⁰ but only if the courts insist upon transparency from the state and order discovery regarding the abilities and capacities of departments of corrections with regard to performing executions.

The question remains whether an alternative method of execution presented in the course of litigation has any constitutional, legal, or real-world relevance. There is no scheme by which a court can order a state agency to carry out an execution according to a procedure crafted by a condemned prisoner, and, generally speaking, courts tend to be reluctant to order states to act. The alternative requirement effectively forces petitioners into the role of policy maker, which simply cannot work, because state statutes direct departments of corrections to develop and promulgate execution procedures.³¹ When plaintiffs have presented straightforward alternatives, such as the firing squad or use of an inert gas, courts balk, announcing that the options are not “available” because they are not permissible under the state’s statute.³²

Although the provision of an alternative procedure — or recognition that constitutional options exist — originated as a reassurance in the course of litigation that a prisoner’s death sentence was not itself at issue, the notion of providing an alternative procedure has taken on a perverse life of its own. This is an insidious aspect of the legal standard: it would allow states to continue acting in an unconstitutional manner because men and women on death row were not able to convince the court of an alternative means to carry out their executions.

Notes

1. *Baze v. Rees*, 553 U.S. 35 (2008); *Glossip v. Gross*, 576 U.S. ___, 135 S.Ct. 2726 (2015).

2. *See, i.e., Nelson v. Campbell*, 541 U.S. 637, 650 (2004) (“there is a strong equitable presumption against the grant of a stay where a claim could have been brought at such a time as to allow consideration of the merits without requiring entry of a stay”); *Hill v. McDonough*, 547 U.S. 573, 584 (2006) (“like other stay applicants, inmates seeking time to challenge the manner in which the state plans to execute them must satisfy all of the requirements for a stay, including a showing of a significant possibility of success on the merits”); *Brewer v. Landrigan*,

562 U.S. 996 (2010) (district court erred in granting restraining order where the risk of harm was speculative because “speculation cannot substitute for evidence that the use of the drug is ‘sure or very likely to cause serious illness and needless suffering’”).

Legally Indefensible:

Requiring Death Row Prisoners to Prove Available Execution Alternatives

(Continued from page 50)

prison system at Atmore or, in case of his or her death, disability, or absence, his or her deputy, shall be the executioner. In the case of execution by lethal injection, the warden, or in the case of his or her death, disability, or absence, his or her deputy, may designate an employee of the unit to administer the lethal injection. In the event of the death or disability or absence of both the warden and deputy, the executioner shall be that person appointed by the Commissioner of the Department of Corrections."); ARIZ. REV. STAT. ANN. § 13-757A ("The penalty of death shall be inflicted by an intravenous injection of a substance or substances in a lethal quantity sufficient to cause death, under the supervision of the state department of corrections."); ARK. CODE ANN. § 5-4-617(e) ("the Director of the Department of Correction shall develop logistical procedures necessary to carry out the sentence of death"); CAL. PENAL CODE § 3604(a) ("The punishment of death shall be inflicted by the administration of a lethal gas or by an intravenous injection of a substance or substances in a lethal quantity sufficient to cause death, by standards established under the direction of the Department of Corrections."); COLO. REV. STAT. § 18-1.3-1204 ("The executive director of the department of corrections, at the expense of the state of Colorado, shall provide a suitable and efficient room or place, enclosed from public view, within the walls of the correctional facilities at Canon City and therein at all times have in preparation all necessary implements requisite for carrying into execution the death penalty by means of the administration of a lethal injection. The execution shall be performed in the room or place by a person selected by the executive director and trained to administer intravenous injections."); FLA. STAT. tit. XLVII, § 922.10 ("A death sentence shall be executed by electrocution or lethal injection in accordance with s. 922.105. The warden of the state prison shall designate the executioner."); GA. CODE ANN., § 17-10-38 ("In all cases in which the defendant is sentenced to death, it shall be the duty of the trial judge in passing sentence to direct that the defendant be delivered to the Department of Corrections for execution of the death sentence at a state correctional institution designated by the department."); IDAHO CODE § 19-2716 ("The punishment of death shall be inflicted by continuous,

intravenous administration of a lethal quantity of a substance or substances approved by the director of the Idaho department of correction until death is pronounced by a coroner or a deputy coroner. The director of the Idaho department of correction shall determine the procedures to be used in any execution. This act shall apply to all executions carried out on and after the effective date of this enactment, irrespective of the date sentence was imposed.”); KRS § 431.220 (“(2) All executions of the death penalty by electrocution or lethal injection shall take place within the confines of the state penal institution designated by the Department of Corrections, and in an enclosure that will exclude public view thereof.”); LSA-R.S. 15:568 (“The secretary of the Department of Public Safety and Corrections, or a competent person selected by him, shall execute the offender in conformity with the death warrant issued in the case. Until the time of his execution, the Department of Public Safety and Corrections shall incarcerate the offender in a manner affording maximum protection to the general public, the employees of the department, and the security of the institution.”); MISS. CODE ANN. § 99-19-51 (“(2) The Commissioner of the Department of Corrections shall select an execution team to assist the executioner and his deputies. This team, including the state executioner and his deputies who are responsible for the administration of lethal chemicals, shall consist of those persons, such as medical personnel, who provide direct support for the administration of lethal chemicals. This team shall also include those individuals involved in assisting in the execution in any capacity, as well as those personnel assigned to specific duties related to an execution.”); N.C.G.S.A. § 15-188 (“[T]he mode of executing a death sentence must in every case be by administering to the convict or felon an intravenous injection of a substance or substances in a lethal quantity sufficient to cause death and until the person is dead, and that procedure shall be determined by the secretary of the Department of Public Safety, who shall ensure compliance with the federal and state constitutions; and when any person, convict or felon shall be sentenced by any court of the state having competent jurisdiction to be so executed, the punishment shall only be inflicted within a permanent death chamber which the superintendent of the state penitentiary is hereby authorized and directed to provide within the walls of the North Carolina penitentiary at Raleigh, North Carolina.”); OHIO REV. CODE ANN. § 2949.22B (West) (the warden of the correctional institution in which the sentence is to be executed or another

person selected by the director of rehabilitation and correction shall ensure that the death sentence is executed); 22 OKLA. STAT. ANN. § 1015B (“The judgment of execution shall take place under the authority of the director of the Department of Corrections and the warden must be present along with other necessary prison and corrections officials to carry out the execution.”); TENN. CODE ANN. § 40-23-114(c) (“The department of correction is authorized to promulgate necessary rules and regulations to facilitate the implementation of this section.”); TEX. CRIM. PROC. CODE ANN. art. 43-14(a) (West) (“Whenever the sentence of death is pronounced against a convict, the sentence shall be executed at any time after the hour of 6 p.m. on the day set for the execution, by intravenous injection of a substance or substances in a lethal quantity sufficient to cause death and until such convict is dead, such execution procedure to be determined and supervised by the director of the correctional institutions division of the Texas Department of Criminal Justice.”); VA. CODE ANN. § 53.1-234 (“Execution by lethal injection shall be permitted in accordance with procedures developed by the Department.”).

32. *Kelley v. Johnson*, 496 S.W.3d 346 (Ark. 2016) (finding that proposed method of execution by firing squad was

not readily implemented and available method of execution because it is not authorized by statute); *Order, Arthur v. Dunn*, No. 2:11-cv-438 (M.D. Ala. Oct. 5, 2015) (“firing squad is not permitted by statute and, therefore, is not a method of execution that could be considered either feasible or readily implemented by Alabama right now”). ■

About the Author

Megan McCracken is the Eighth

Amendment Resource Counsel with the U.C. Berkeley School of Law’s Death Penalty Clinic. She provides litigation support and expert consultation to attorneys who are challenging lethal injection practices.
